

Davian Systems Ltd

Dav-rack Galvatite Archive Shelving

A cost effective solution, and adjustable shelving system

Archive Shelving

Expert specialist archive storage and retrieval contractors have chosen this shelving system, as it is ideally suited to the size and weight of the standard archive box. Medical Records, Legal Files, Accounts, and all documents that need to be kept for up to 7 years can be efficiently stored on this system. Having a galvanised finish, adjustable steel shelving system, and complete with triple walled boxes 270mm High x 350mm Left to Right x 440mm Deep, makes it ideal for storerooms.

Garment Hanging Shelving

Supershelf garment hanging systems, for retail stockrooms and display areas. It can be combined with normal flat shelving, and modular containers. It is very popular when used for 2 and 3 high runs of hanging clothes.

The clothes hanging system can come in bays 1200mm and 900mm long and can be single or double sided, depending on whether the clothes storage racks are up against a wall or free standing in the middle of the store.

Davian Systems Ltd

Dav-rack Galvatite Supershef Systems

Adjustable Steel Shelving

Supershef is a simple shelving system that offers a range of accessories including mesh back cladding, shelf dividers, modular containers, small parts storage bins and label holders. The system is strong and safe, and conforms to current industry standards (SEMA).

The bolt free shelving system is designed for retail, wholesale, catering and industrial stores applications.

With the following features:

- Shelves are adjustable on a 33mm pitch
- Offers a bolt free construction
- Surfaces are easy to clean
- A bright appearance
- Offers great strength and durability

This flexible system can be designed as a two tier shelving system, a high rise system, or a mobile unit. The modular containers are ideal for storing loose small items that are unstable and would easily fall off a flat shelf.

Davian Systems Ltd

Dav-rack Galvatite Supershelf Systems

A tyre rack boltless system, that is fast and easy to install, without the need for special tools. The tubular beams providing perfect support for car tyres. With the capability of rack heights being up to 5 Metres high.

Hugely popular with tyre distributors, and dealers as the system is quick to get up and running.
