Product Features:

- High-impact strength
- Virtually unbreakable
- Easy to clean
- No algae growth
- Easy to install
- High abrasion resistance

Benefits:

- Registered design number 2051986
- Machined from solid polyethylene
- Any radius accommodated
- Available in a range of colours
- Guaranteed for five years

Maxiflow® Pool False Floors and linings made from polyethylene are used to reduce long term costs of existing tiled pools for pool owners.

Reasons for false floor installation:

- Solves recurring pool floor tile problems.
- Greater safety for children.
- Reduces risk.
- Allows aquarobics and ease of teaching.
- Lining provides no algae growth, makes for easy cleaning.
- Re-tiling of a pool can take up to 12 weeks resulting in potential loss of revenue
- Maxiflow® Pool Lining can be installed within 7 days.
- Polyethylene provides high impact resistance compared to standard tiles. Ideal for pools where canoeing takes place.

Pool Lining Colours & Finishes

Maxiflow® Pool Linings are made of polyethylene and can be ordered in any colour including mottled.
